On-Site, Real-Time TO-15 Analysis

H&P's Mobile TO-15 laboratory meets requirements for the following regulatory agencies:

**DTSC
 LARWQCB
 SAM
 NELAP**

*Perfect for vapor intrusion sites!
 On-site analysis provides real-time information to enable real-time decisions.*

Benefits of the Mobile TO-15 Laboratory:

- Analysis of soil gas, indoor air and ambient air samples
- Detection levels below residential CHHSLs for all VOC's, including benzene and vinyl chloride
- Prices are equivalent to costs for off-site analysis in summa canisters
- Eliminates the hassle of summa handling and shipping
- Immediate analysis of purge volume test and tracer gas to ensure sample integrity
- Real time results allow decisions to be made in the field about sample quantity and location
