

VAPOR MONITORING PROBES

Self-Installation
& Sampling Supplies

Monitoring Implant

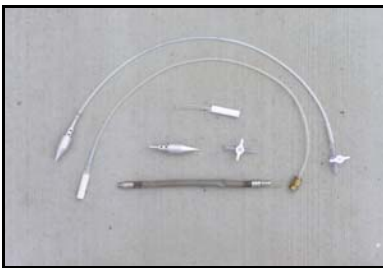

Our vapor implants are inexpensive, unintrusive and offer repeated analysis at multiple depths

You Can Do . . .

- ▼ Vapor Intrusion Assessment
- ▼ Sub-slab Soil Gas Samples
- ▼ Documenting Bioattenuation
- ▼ Vertical Soil Gas Gradients

H&P's vapor monitoring probe kits allow seamless installation and low internal dead volumes for easy sampling at depths ranging from shallow to hundreds of feet. Implants can be

installed using hand techniques such as drive rods and hand-auger.

Call H&P for the Analysis too!
